

# SIDDHESH KAKADE

## PROFILE

Detail-oriented Full Stack Python Developer who is known for implementing technical skills through academic projects and internships. Knows Python, Django and JavaScript well on the other hand is good at front-end development.

## PROJECTS

### Greet Cart

05/2024 - 07/2024

- This innovative digital solution developed to root customer engagement in retail, Greet Cart. With features like personalized product recommendations, real-time inventory updates and customer support Greet Cart is set to enhance shopping experience by making it easier and fun.

### Office Employee Management System

03/2024 - 04/2024

- The dashboard will have a simple face for the employees and managers, where they can access their profiles, work schedule & performance tracker with ease. The system will also come with payroll administration and professional development tracking capabilities.

### Blood Bank Management System

01/2024 - 02/2024

- Designed the User Interface in the Blood Bank Management System project, and implemented it. I developed user-friendly and responsive web pages for donor & recipient data management and blood inventory tracking to deliver a complete solution at the client side.

### Car Rental System

09/2023 - 11/2023

- In the Car Rental System project, my contribution was to design and develop the front-end user interface. I built a lot of responsive web pages, handled user interactions on those pages.
